News From Nurse Penny:

If you have a fall at home, write down the details, when, where, how and discuss with your Doctor. Health conditions may increase the risk of falls, such as, dizziness, joint pain, shortness of breath, numbness in legs and feet. Always review medication with your Doctor. **Notify Nurse Penny of any falls, hospital visits and medication changes.**

When you leave the Living Room, please take the time to use the sidewalk versus walking over the curb across the grass. Falls are a leading cause of broken hips and other serious injuries in the elderly.
